Comfort

Long-term comfort is the result of excellent support with the freedom to move, stretch and flex naturally.

arq seats and backrests are contoured to match the human form, supporting a healthy posture whilst reducing tissue compression and consequent discomfort.

arq chairs are naturally responsive.

They move in harmony with the user providing continual support.

Meeting & Visitor Chairs | Responsive

Work Chairs | Adjustable and Responsive

Computer Healthy

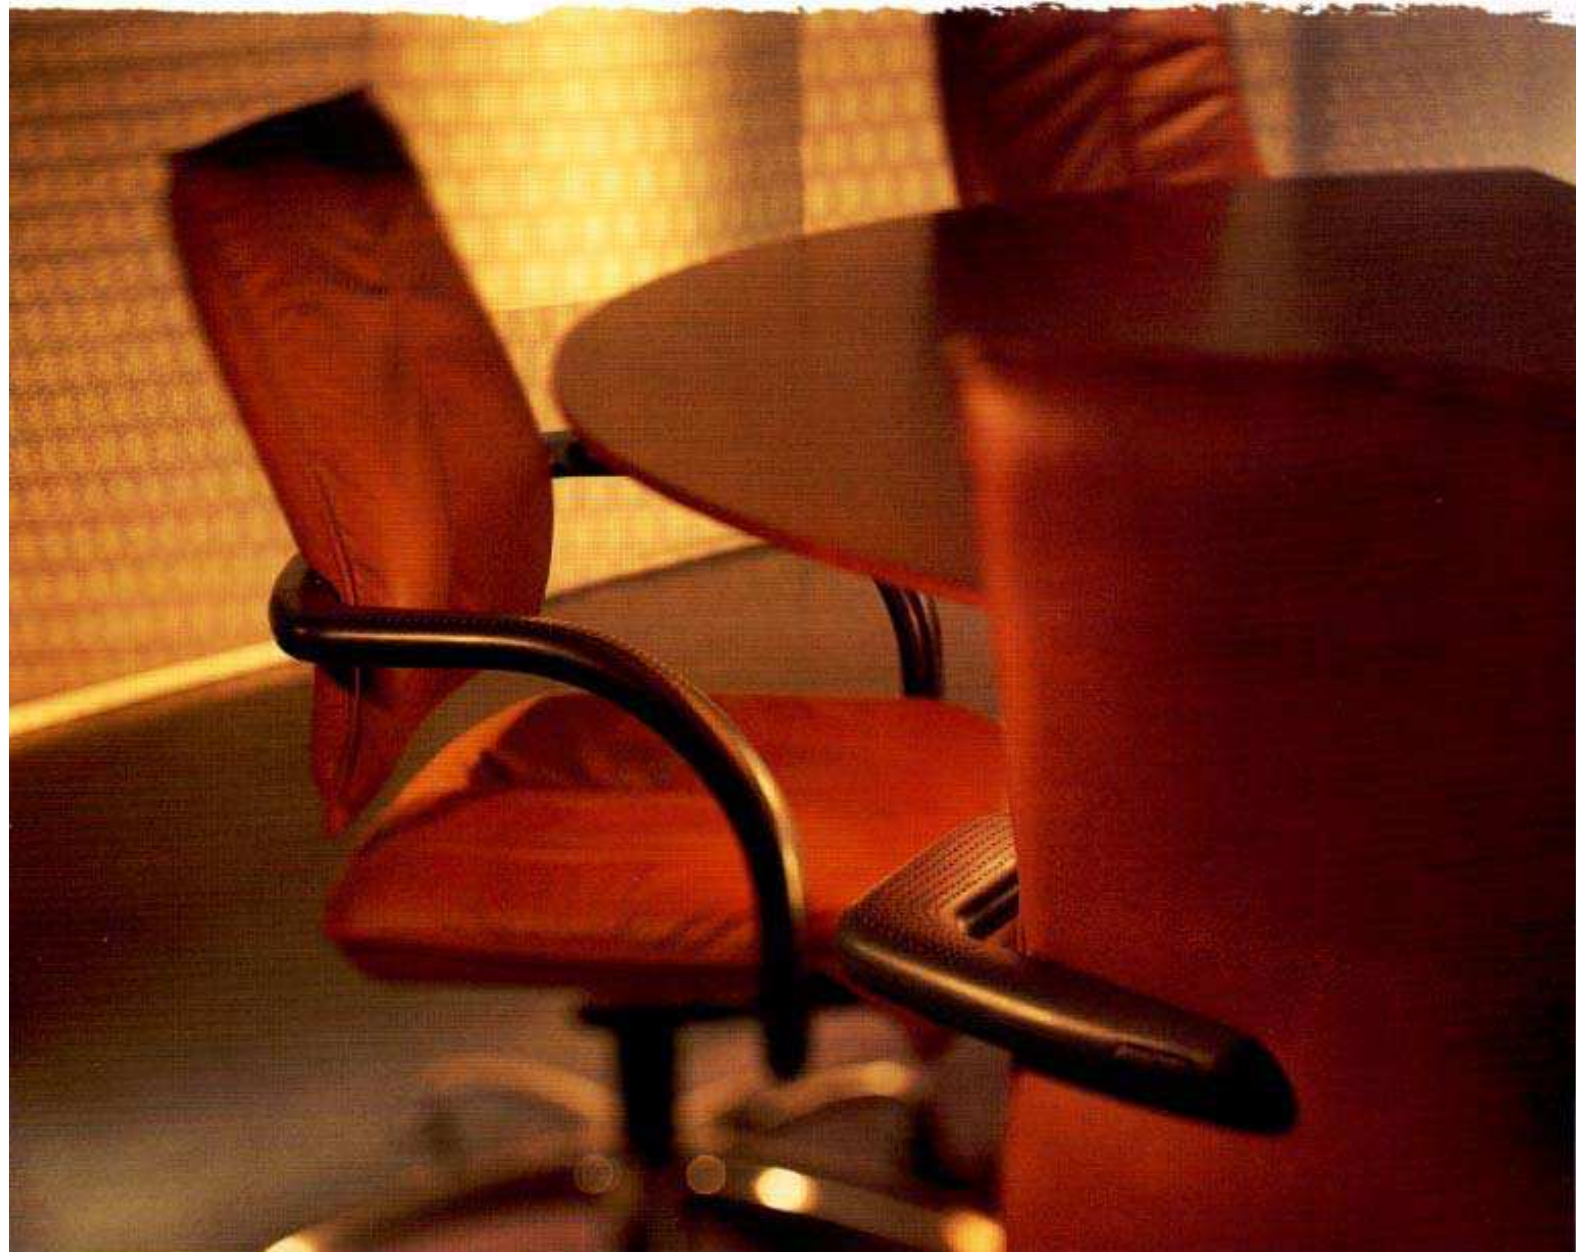

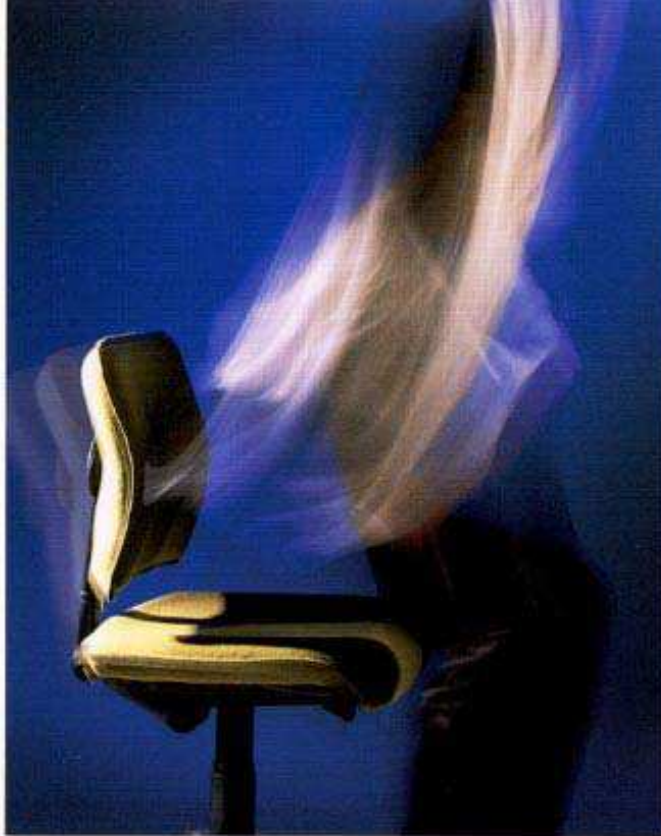

Adjustment Ease

Adjustments are of value only if they are used effectively. arq office chairs have a permanent built-in guide. All adjustments are labelled and easy to use.

Everybody has similar physiological requirements whether they are executive managers or office juniors. arq chairs fit all but the very smallest and largest people.

Strength & Durability arq chairs are engineered to withstand the rigours of continual office use. They are tested to BS: 5459 *part 2*. The fatigue test is the equivalent of a 100kg person getting into the chair every 13 minutes 24 hours a day *seven* days a week for 5 years

Non Damaging
arq is impact absorbing to protect both the chair and adjacent *furniture* from damage

CFC Free arq chairs

are produced without the *use* of Ozone depleting *substances*

Removable armrests all arq

work chairs can have arm rests fitted or removed easily on site.
