square leg

curved leg

product details

Wires are routed along the structure below the table tops using wire trays that are hooked to the aluminium beam.

The panel holder is designed to hold the fabric panel along the centre channel of the workstation.

The functional and design versatility of the integrated cable management modules provides the right solution to suit any demands.

Revised 0511

The unique design of the Diagonal & Square leg is designed to allow height adjustment of 180mm. With this height adjustment, different thickness table tops can be mounted on with-
