ATLAS TRANSPORT CHAIR

Durable, strong and able to safely transport up to 250kgs

Product code: MJ001

The Atlas Transport Chair has been designed in Australia to meet the specific needs of bariatric patients in our hospitals and facilities. The Atlas Transport Chair is extremely stable, will not tip over and is very easy to manoeuvre even with bariatric patients. No exertion is required than a standard wheel chair and provides a safer alternative for your staff.

Neck and erect chest X-Rays can be performed in chair and saves time for medical imaging staff as the need to move patients is

Options Cellular weight scales built into seat section.
Motorised module for chair drive.

Specifications:

- Puncture proof solid 350mm diameter rear tyres
- Independent 100mm front swivel castors
